

The Arts: Grades 1 & 2

All of the following workshops fall under the Arts portion of the Ontario School curriculum and are designed to meet both overall and specific expectations as outlined by the ministry.

Grades 1 & 2: In the Spotlight

In this workshop the children will participate in a variety of different activities where they will be focusing on movement of different parts of their body such as using different facial expressions to convey their thoughts and feelings, moving to the beat and rhythm of different types of music and getting their bodies ready for action by doing some animal yoga. Then we will get ready to move and shake as we make some musical instruments that will help us tell a story and have some fun singing some karaoke songs.

What you can expect:

- The children will learn how music can help create feeling and emotion when presenting a play or scene.
- Students will make their own musical instruments.
- Discussion about how we can use our bodies to tell a story and convey our feelings.
- Small group rotation.
